How To Batch Add Vaccinations to Multiple Residents - UK

STAT Dose

To automatically record a vaccination as "Administered", add it on to eMAR as a STAT dose.

This should be done as soon as possible after administration.

This can be done for multiple residents at the same time using the "Add to MAR/TAR Batch" feature.

1. Navigate to eMAR > Orders > Add to MAR/TAR **Batch**.

2. Select the residents by placing a tick in the box next to their names.

3. Select the Prescriber from the dropdown list.
   Leave the Order Date as today's date
   Select "MAR" as the Med Type.

4. Search for the appropriate vaccination, for example you can search for "COVID" to display the COVID-19 vaccinations available in the UK.

   Select the correct vaccination from the list.

5. Enter the following information:
   A. **Strength Amount & Unit:** If not pre-populated, enter zero.
   B. **Total Dispensed Amount:** Enter 1 (one injection/administration).
   C. **Frequency:** Select "STAT" from the dropdown list.
   D. **Dose Amount & Unit:** Enter "1" and select "Injection" from the dropdown list
   E. **Duration:** This will default to 1 for a STAT dose and cannot be changed.
   F. **Route of Administration:** Select from the dropdown list.
   G. **Administration Start Date & Time:** Enter the date and time that the vaccination was administered.
   H. **Add to MAR/TAR Entry:** Leave this box ticked
   I. **Directions:** Type in the directions

6. Select the appropriate Pharmacy Source.
   Click "Add to MAR Now"

7. You may be required to obtain a Witness Signature
